HomeScape Ideas (Tips)

If you don't want to cheat, here are some Homescapes tips.

1. Only play Homescapes when you have at least an hour to spare, as the unlimited lives booster only lasts an hour.
2. Return every day to claim your daily reward, and every seventh day to receive a life booster.
3. Count how many levels you've completed because Homescapes will give you a 3-hour unlimited lives boost on the 10th level.
4. Your lives are replenished when you begin a new day. So, before you click the start new day button, make sure you've exhausted all of your lives.
5. Always abandon a mission if you are unable to complete it or it is too difficult if you have an infinite life booster active. This is due to the fact that it saves you time.
6. Analyze the grid before making any moves, and keep your cool throughout the game.
7. Concentrate solely on the mission objectives. Don't bother attempting to achieve anything other than the mission objectives. If there are apples and the goal is to collect cups, leave the apples alone!
8. Make as many combinations as you can.
9. Remember that the paper plane destroys five boxes on the grid, including all adjacent tiles and the one on which the plane is currently flying.
10. If necessary, try the same level several times—the goal is to improve your game.
11. Try to predict your next move—ask yourself, "What are the consequences of making this move?"
